

Onboard 5", & 10.1" Mobile Quad Display Monitor installation and setup manual

This compact lightweight three channel display allows drivers to safely monitor important areas either inside or outside their vehicle.

SMQ-0XX0A -SMQ-0XX0H Series

1) CAUTION

1. Do not attempt your own maintenance. If something does not seem right turn the monitor off and consult your installation company. The monitor is composed of multiple electrical components that could be damaged or broken if the casing is opened invalidating the warrantee.
2. Do not expose the monitor to direct sunlight, high humidity, dust, steam oil or smoke.
3. When maintaining the monitor wipe the monitor with a soft cloth, do not use thinners or other chemical cleaning agents.
4. Do not expose the monitor to excessive heat or cold, operating the monitor outside the permissible range of 0°C to 40°C is likely to cause damage and result in a poorer performance.
5. Only use specified adapters power sources and battery packs.
6. For your safety, elongating the monitors life and to save energy turn the power off when not in use and unplug the adapter.

7. Avoid dropping monitor or subjecting it to a strong impact.

2) BASIC OPERATION

1. Connect the power and switch the monitor on. The red "stand-by" indicator will turn green "working".
2. Press "X" button or AUTO to switch to PAC/AV/TV mode.
3. Connect the video cable connector(s).
4. Press the "MENU" button to adjust: Brightness, Contrast ratio, Sharpness and Saturation. Factory default 50.
 - i. Picture adjustment: auto, horizontal, vertical, phase, clock.
 - ii. Languages: English, etc...
5. Volume button to adjust.
